

GROUP LOOP

Group Loop is a new innovative way for people that are in a group living situation to communicate without actually talking to each other! Use Group Loop to set up shopping lists that everyone in your group can access from their phone, or make a schedule to make sure your group knows where you are.

Group Loop is an Android app that uses Java and XML to take in information and store it in a Firebase database.

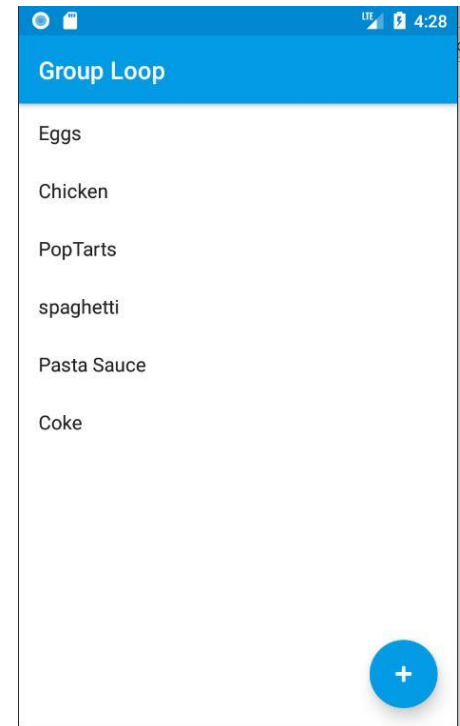

Ferocious Hammerheads

Current Features:

- The ability to create and login to an account
- Create and edit a list
- Create and edit a schedule
- Save the lists and schedules to our database

Future Features:

- Create multiple groups
- Group chat
- Personal profile
- Ability to store a list or schedule on RFID chip
- Schedule UI
